

## Nuffield Farming Scholars sponsored by BEMB Trust since 1973

| YEAR | NAME               | SUBJECT  |
|------|--------------------|--|
| 1974 | Aled Griffiths     | Technical developments in the egg industry in the USA and Canada   |
| 1975 | Robin Lucas        | Large unit egg production and pullet rearing in the UK, Belgium, France, Holland and Germany                         |
| 1975 | Keith Martin       | Egg production in USA and Canada   |
| 1976 | Nigel Sutcliffe    | Egg production   |
| 1979 | David Cross        | Pullet rearing in Europe and the USA   |
| 1980 | Mike Midgley       | Egg handling and storage in the USA  |
| 1981 | Vic Thorman        | Egg production in USA and Canada   |
| 1984 | Nick Firth         | Egg production management in USA and Canada  |
| 1985 | Michael Kent       | Uses and handling of poultry manure in USA   |
| 1987 | David Tromans      | Influence of production techniques on egg quality in France, Holland and Germany                                     |
| 1989 | John Reed          | Practical disease control measures in commercial flocks, Europe and USA  |
| 1990 | Richard Wagstaff   | Production methods in the light of consumer demand, particularly in relation to welfare                              |
| 1991 | Heddwyn Owen       | Egg production : nutrition, pollution, welfare, consumer perceptions and marketing                                   |
| 1992 | David Parsons      | Status of diseases specific to poultry and their control   |
| 1993 | Andrew Riley       | The consequences for UK egg producers of the EC Directive on cage regulations and attitudes to welfare in the EU     |
| 1994 | Harry Irwin        | Poultry production and systems of waste handling, the effects of forthcoming legislation in Europe and the USA       |
| 1995 | Karen Campbell     | How to succeed as a Chief Executive  |
| 1996 | -                  | no award given   |
| 1997 | Julian Madeley     | The future of the UK egg market, and the effect of increasing egg processing, new technologies and shifting demand   |
| 1998 | -                  | no award given   |
| 1999 | Rachel Watkins     | The changing relationship between the farmer and consumer with special reference to shell eggs                       |
| 2000 | -                  | no award given   |
| 2001 | Richard Langdon    | The opportunities that EU enlargement will give to the egg industry  |
| 2001 | Steven Pritchard   | Ways of adding value to shell eggs   |
| 2002 | Lorna Craig Aucott | The feasibility and future for organic egg production  |
| 2003 | Nichola Madeley    | Change management and employment in the egg industry   |
| 2004 | Mark Williams      | The effectiveness of trade associations in influencing government policy, with particular emphasis on animal welfare |
| 2005 | -                  | No award given   |
| 2006 | -                  | No award given   |

|      |                  |  |
|------|------------------|--|
| 2007 | Mike Tyers       | Ways in which poultry farmers and organisations can reduce their “eco” footprint.                    |
| 2008 | Matthew Davies   | IPPC. Reducing ammonia emissions from livestock: assessing both technical and economic feasibilities |
| 2009 | Nick Chippindale | The 2012 EU ban on battery cage egg production and its effect on global egg markets                  |
| 2010 | Helen Houghton   | Disease prevention in the chicken embryo and the young chick   |
| 2011 | -                | No award given   |
| 2012 | -                | No award given   |
| 2013 | Sara Gibbins     | The effects of globalisation and changing dynamics on the egg processing industry                    |
| 2014 | -                | No award given   |
| 2015 | Gordon Whiteford | Improving bird welfare on free range systems   |
| 2016 | -                | No award given   |
| 2017 | James Corbett    | What is the future of colony and caged egg production?   |
